## Highest Quality Standards

### Production Facilities

- ISO 9001 certified factories
- Broad-based manufacturing facilities
- Cost-effective manufacturing systems including packaging, subassembly, kitting, etc.
- Flexible manufacturing systems

### Technical Capabilities

- Engineering design
- Life analysis calculations
- Application analysis
- Product inspection including dimensional, geometric, hardness levels, surface finish, etc.

### Value-Added Services

- Dedicated customer service with more than 150 years of bearing experience
- Inventory management systems / Forecast management
- Kanban programs
- Parts kitting
- EDI capability
- Experts in hard-to-find bearings

## Ball Bearings

- Now in stock!
- ABEC 1 and 3 grades in stock
- ABEC 5 and 7 made to order
- Electric Motor Quality
- High quality Mobil Polyrex EM grease
- Available open, shielded or sealed

## Tapered Roller Bearings

- Superfinished (honed) for long life
- Crowned profiles optimize stress distribution
- “Aircraft quality” 52100 bearing steel
- All sizes ¾ inch to 4 feet!

## Spherical Bearings

- Popular sizes in stock
- Available with bronze or steel cage
- C3 clearance provided as standard

## Cylindrical Bearings

- Good for heavy radial loads
- One-, two-, and four-row designs available
- Available with bronze or steel cage
- C3 clearance standard

## Needle Bearings

- Transmission/planetary gear applications
- Cage-only assemblies, machined cup, drawn cup
- Full complement, steel cage, nylon cage

## Plain Bearings

- Plain, flanged, and spherical
- Bronze, Steel, POM, PTFE
- Metric and inch sizes

## Mounted Bearings

- Pillow blocks
- Flanged units — 2 bolt and 4 bolt
- Solid cast iron construction
- Set screw locking or eccentric collar locking

## Specialty Bearings

- Slewing ring bearings
- High-precision bearings
- Underground bearings
- Polyurethane clad bearings
- Thin section bearings
- Ceramic ball bearings
