About Shuster Corporation

Accuracy and precision are the pillars of value-added services which are maintained through a carefully crafted process entailing environmental control, documentation and technology.

From our beginning in 1916 as a distributor of industrial products to local manufacturing and marine customers, Shuster Corporation has grown to become a recognized leader in the bearing industry.

Shuster Corporation is a US based, multinational supplier of industrial bearings with the experience, relationships, and know how to provide value added solutions to our customers. Our focus is on identifying specific customer needs and providing the right solution for their requirement.

Shuster bearing products are applied into Industrial, Agricultural, Oil and Gas, and Automotive applications throughout the world. Our extensive inventory has been the cornerstone of our unparalleled service to our customers. Our engineering and application expertise has provided our platform for continued growth.

In addition to our bearing expertise, Shuster is a distributor for many of the world's primary manufacturers for industrial and filtration applications. From industrial hose and fittings to diesel fuel and air filtration applications, Shuster has the products and application knowledge to keep your business running smoothly and cleanly.
